Contractor's Comments:

We propose this as our current, tentative plan, as we are in communication with a company that is awaiting SDVOB certification with the State, who we would intend to potentially utilize for some of the plumbing installation scope of work, as our subcontractor. Right now, however, that company does not have an approved SDVOB certification, but they soon should. We feel confident that currently we can plan to utilize Resilient to purchase some materials, as needed, to get at least partial participation.
